OBJECTIVE

Detail-oriented and results-driven Full-Stack Developer with a strong focus on frontend technologies and solid backend experience. I aim to contribute to building impactful, scalable web applications in a dynamic, forward-thinking environment. Passionate about clean code, intuitive user interfaces, and agile collaboration, I seek opportunities to solve real-world problems while continuously growing as a developer.

WORK EXPERIENCE

Jemmia Diamond

July 2025 - Present

Product Engineer

Contributed to the development of digital products that empowered sales teams, streamlined business operations, and enhanced the customer purchasing journey for a luxury jewelry retailer.

Project: Jemmia Diamond E-commerce Platform

- Team size: 5 members
- Technologies: Haravan Liquid, Vanilla JavaScript, SCSS, AJAX, JQuery, HonoJS, PostgreSQL, CCloudflare service (KV, R2, Queue, Scheduler)
- Developed and maintained Jemmia's luxury e-commerce platform to drive online sales, strengthen brand presence, and generate qualified customer leads.
- Delivered marketing campaign landing pages and promotional microsites to support seasonal campaigns and increase conversion rates.
- Built advanced diamond search, jewelry customization, AJAX cart, multilingual support, and order tracking features.
- Implemented SEO enhancements, structured data (Schema.org), and performance optimizations to improve search visibility and user experience.
- Link: <https://jemmia.vn>

Project: Salesaya – AI Sales Assistant Platform

- Team size: 4 members
- Technologies: React 19, WXT, Tailwind CSS v4, NestJS, Bun, PostgreSQL, Redis, BullMQ, TypeORM, Kysely, Docker, Sentry
- Built an AI-powered Chrome Extension enabling sales consultants to receive contextual reply suggestions directly within Pancake/Facebook conversations, improving response efficiency.
- Developed high-performance backend microservices with NestJS and Bun, providing RESTful APIs for customer, order, appointment, and AI workflows.
- Designed asynchronous AI pipelines using BullMQ and Redis to process large volumes of LLM requests (Gemini) reliably.
- Implemented AI-based lead scoring to automatically prioritize high-potential customers for sales teams.
- Integrated Pancake, Lark Suite, and NocoDB APIs to automate customer management and internal operational workflows.
- Established CI/CD pipelines using GitHub Actions, Docker, Dokploy, and Chrome Web Store publishing, with real-time monitoring through Sentry.

Project: Partner Management Platform

- Team size: 2 members

Delta Cognition

March 2024 - June 2025

FPT Software - FHM.ADG

October 2022 - April 2023

- Technologies: NestJS, PostgreSQL, Redis, BullMQ, Cloudflare R2, Zalo ZNS, Handlebars.js
- Developed an affiliate and partner management platform automating commission tracking, KYC verification, and withdrawal workflows.
- Integrated Haravan webhooks to synchronize orders and calculate commissions in real time.
- Built secure wallet, withdrawal, and document management modules while integrating ZNS and Lark Suite for internal approval workflows.
- Link: <https://partners.jemmia.vn>

Project: Product Search

- Team size: 1 members
- Technologies: React 19, TypeScript, Tailwind CSS v4, TanStack Query, Framer Motion, Redis, Shadcn
- Built an internal sales support platform that reduced time spent on non-selling activities by providing fast access to product and inventory information.
- Developed advanced search and filtering capabilities for GIA diamonds and jewelry, enabling consultants to locate suitable products within seconds.
- Implemented AI-powered Virtual Try-On, allowing customers to preview jewelry digitally and helping consultants deliver more engaging product demonstrations.
- Link: <https://products.jemmia.vn>

Project: Ring Customizer Platform

- Team size: 2 members
- Technologies: React, TypeScript, Tailwind CSS, Motion, NestJS, PostgreSQL
- Developed an interactive ring customization platform that enables customers to design personalized engagement and wedding rings based on their preferences.
- Built a real-time product configurator allowing users to customize ring settings, metal type, diamond shape, size, and other design options with instant visual feedback.
- Link: <https://design.jemmia.vn>

Software Engineer

Played a pivotal role in designing and developing innovative AI-driven proof-of-concept (POC) and minimum viable product (MVP) projects, tailored to the CEO's vision.

Project: Intelligent Farming Tutor

- Team size: 4 members
- Position: Full-Stack Developer
- Technologies: React (TypeScript), Python (FastAPI), Redux, Material UI, Celery, Redis, Azure Blob Storage, WebSocket, Docker
- Led the development of an AI-powered platform introduced to African nations, focusing on agricultural education and support, managing end-to-end implementation from concept to deployment.

Project: Agnostic Data Discovery

- Team size: 5 members
- Position: Full-Stack Developer
- Technologies: Next.js, Python (FastAPI), Zustand, Redis, PostgreSQL, Azure Blob Storage, Docker, Traefik
- Engineered a data analysis tool leveraging AI to process and interpret customer data, enhancing decision-making for analysts and researchers

Project: Interview Preparation System

- Team size: 7 members
- Position: Frontend Developer
- Technologies: Next.js, React Query, Shadcn, Zustand, WebSocket, Docker, Traefik
- Built an AI-driven interview simulator enabling job seekers to practice with avatar-based interviewers, text-to-speech, and dynamic question generation

Backend Developer

Contributed to the development of ION Orchard, a retail application for Singapore's iconic

shopping mall, supporting seamless user experiences.

Project: ION Orchard

- Team size: 40 members
- Position: Backend Developer
- Technologies: Java 8, Spring Boot, MySQL, Redis, Message Queue, Azure Devops
- Collaborated with technical leaders to create diagrams, fix bugs, implement minor features, and assist the front-end team with API integration, while addressing bug reports from the testing team to ensure system stability.

PROJECTS

Minca AI Assistant

April 2025 - May 2025

Frontend Developer

Customer: Minca AI
Team size: 2 members
Technologies: React, TypeScript, React Query, Shadcn, Zustand, Tailwind CSS, Docker.
Served as a frontend developer for this MVP, designing a web-based platform to demonstrate MincaAI’s AI agents to potential clients, simulating operational task support, including customer service and automation.

CCI Interface

May 2025 - June 2025

Frontend Developer

Customer: Minca AI
Team size: 2 members
Technologies: React, TypeScript, React Query, Shadcn, Zustand, Tailwind CSS, Docker.
Developed a multi-channel AI customer support platform for CCI Mexico with web and WhatsApp integration. Built dashboards for conversation monitoring, KPI analytics, lead management with Google Sheet integrations, and campaign automation

Communication

Vietnamese, English

Programming languages

JavaScript, TypeScript, Java, Python, Liquid

Front-End

React.js, Next.js, Redux, Zustand, React Query, RTK Query, Tailwind CSS, Material UI, ShadCN, Ant Design, Framer Motion

Back-End

FastAPI, Spring Boot, Node.js, NestJS, Hono, Celery, Nginx, Docker, Traefik, BullMQ, WebSocket

Data management

SQL, NoSQL

Tools & Processes

Git, Github Action, SourceTree
Agile/Scrum, Sentry, Notion, Azure DevOps

Deployment

Azure, AWS, Cloudflare, Netlify, Render, Azure Blob Storage,

EDUCATION

2019 - 2023

Bachelor’s degree in Software Engineering

FPT University (full-tuition scholarship)

- GPA: 7.89/10

CERTIFICATIONS

2023

User Experience Research and Design

2022

Software Development Lifecycle

2020

Championship of public speaking

ACTIVITIES

2019 - 2020

FPTU Scholarship Hunting Association

Mentor

Provided guidance and resources for candidates preparing for FPT University’s entrance scholarship competition.
